MIGUEL CAMARENA

708 506 1938 | Berwyn, IL 60402 | mcamarena@my.dom.edu | https://linkedin.com/in/mcamarena1/ | https://github.com/Mijool

Professional Summary

Mathematically grounded, collaborative, and bilingual software developer bridging algorithmic logic with scalable systems. Actively thrives in fast-paced group environments, engineering modular full-stack applications and optimizing data pipelines. Eagerly delivers impactful code by blending quantitative precision with disciplined, production-grade development standards.

Education

- Dominican University | River Forest, IL
- *Bachelor of Science in Computer Science and Mathematics* | Minor: Computer Information Systems
- GPA: 3.9/4.0 | Mazzuchelli Scholars Honors Program, Presidential Scholarship, Kappa Mu Epsilon Honor Society
- Publication: Camarena, M. "British Manufacturing Company Becomes Industry Leader in Safety," *AIM2Flourish*, 2024.

Technical Skills

- Programming: Python, Java, C#, SQL, R, JavaScript, TypeScript, HTML, CSS, PHP
- Frameworks/Libraries: Node.js, React, ASP .NET MVC, Entity Framework Core, Photon PUN, FastAPI, NumPy, Matplotlib, Pandas
- Developer Tools: Git, GitHub, Visual Studio, SQL Server Management Studio (SSMS), RStudio, Unity, VS Code
- Concepts: REST APIs, JSON, N-Tier Architecture, Relational Database Design, Operations Research
- Bilingual: Fluent in English & Spanish (State Seal of Biliteracy)

Software Engineering Experience

Battle Planes | Remote

Full-Stack Software Development Intern (Team Environment) | January 2026 – May 2026

- Collaborated dynamically within a multi-developer team using Git/GitHub to build a dynamic UI system that retrieves real-time asynchronous server data locally to eliminate runtime latency.
- Diagnosed and resolved multiple server to UI transaction race conditions to prevent account statistics from desynchronizing across concurrent player sessions.
- Reengineered real-time multiplayer room networking using Photon Unity Networking (PUN) to integrate robust network event callbacks and eliminate client data loss, improving player retention.

Technical & Applied Projects

Operations Research Simplex Algorithm Solver & Visualizer Web Application | Independent

Freelance / Personal Project | October 2026

- Developed a Revised Simplex method Python solver from scratch to compute optimal solutions for multi-variable linear programs.
- Built a React + Typescript frontend and FastAPI backend to deliver a cross-platform mobile & desktop single page application.
- Configured Matplotlib to generate a real-time 2d graph of user-entered constraints & optimal solution via Base64 JSON payloads.

HR Employee Management System | River Forest, IL

Course Project (Advanced Web Development II) | April 2026

- Engineered a 3-Tier ASP.NET web app separating business logic, presentation, and data access layers for scalability.
- Integrated Entity Framework Core with SQL Server to execute transactional CRUD operations on relational tables, using service interfaces and RegEx validations to enforce data integrity.

Operations Efficiency & Quality Predictive Analysis | River Forest, IL

Collaborative Group Final Project (*Managerial Analytics*)| April 2026

- Co-developed an automated R pipeline via dplyr and tidyr to clean and reshape fragmented Excel datasets into relational formats.
- Programmed statistical KPI models and compiled visualized downtime drivers on an academic report using Pareto charts and corrplot matrices via ggplot2 & kniter.

Professional Work Experience

United Parcel Service (UPS) | Hodgkins, IL

Warehouse Freight Unloader | September 2023 – Present

- Unloaded 1500+ packages hourly, coordinating within an 8-person team to optimize workflow and unload 15+ trailers daily, meet strict deadlines, maintain zero accidents, and restore damaged goods all to prevent delays in delivery.

Juan Sanchez Landscaping & Construction | Cicero, IL

Shift Team Leader | April 2020 – August 2024

- Supervised daily operations and routes to complete 18+ properties per shift. Coordinated refueling and mechanical checks, trained 3 new hires in safety & operations, and conducted quality checks to increase client satisfaction and repeat business.
