CAREER & VOCATION

Planning & Goal Setting

Your living plan across the CV curriculum

STUDENT NAME	STUDENT ID (OPTIONAL)
Miguel Camarena	_____
MAJOR / PROGRAM	**EXPECTED GRADUATION**
Computer Science and Math	May 2027

ONE DOCUMENT. FOUR CHECKPOINTS.

CV100 EXPLORE Learn about yourself and take realistic next steps.

CV200 DEVELOP Explore options intentionally and build needed experience.

CV300 REFINE Connect your evidence to a clearer professional direction.

CV400 TRANSITION Turn readiness priorities into a post-college transition plan.

This document is a record of growth, not a test of whether you have your future figured out. Keep earlier responses. Add a new dated entry at each checkpoint so you can see what changed—and what stayed important.

FALL 2026 INTERIM CURRICULUM ENHANCEMENT

Since this is new, I don't have the rest of the sheet from my previous semesters

CV400 | TRANSITION	**Evaluate readiness and create a concrete post-college transition plan.**

1. Post-College Direction

Date: 9/14/26 **Expected graduation: May 2027**

My primary direction after college

State the opportunity or pathway you intend to pursue first. Examples may include employment, graduate or professional study, service, entrepreneurship, or another planned transition.

My primary direction after college is full-time employment at a company in my field

My alternate or flexible direction

If the primary direction takes longer than expected or changes, what related option will you pursue while continuing to move forward?

If I am unable to get a full-time job after graduation, I want to pursue a master's degree in a closely related field as a second option

2. Readiness Review

Rate each area honestly. Use "Not applicable" where appropriate, then name the evidence or remaining priority.

Readiness area	My current evidence	Status	Remaining priority
Direction and target opportunities	Spoke to EIR, have been getting responses on my applications and have my preferences figured out	☐ Ready ☐ In progress ☐ Priority ☐ N/A	
Relevant skills and experience	Have had an internship and am proficient in a handful of languaged	☐ Ready ☐ In progress ☐ Priority ☐ N/A	more practice and personal projects
Application materials / professional profile	LinkedIn is fully fleshed out, resume and cover letter are effective	☐ Ready ☐ In progress ☐ Priority ☐ N/A	refine resume using EIR advice
Professional relationships and references	Still have my previous' boss email, and have a cousin that works in the field	☐ Ready ☐ In progress ☐ Priority ☐ N/A	Keep reaching out to more people and build those relationships
Search, application, or admission strategy	Getting emails back for the applications I submit, could search on sites other than linkedin/indeed	☐ Ready ☐ In progress ☐ Priority ☐ N/A	keep applying, find new sites
Practical transition needs	Have the skills to get a job, but not secured	☐ Ready ☐ In progress ☐ Priority ☐ N/A	Save money, have an offer lined up

CV400 | TRANSITION	Final checkpoint: convert priorities into a realistic transition plan.

3. My Transition Action Plan

Build a plan for the period leading to graduation and the first months afterward. Include only actions that matter for your chosen direction and circumstances.

Action	Deadline	Support / contact	Evidence of completion	Status
Find a job either in my field, an adjacent one, or an internship	April 15th	DU, my effort, cold emails	A salary offer	Not completed
Create more personal projects and build a portfolio	April 15th	None	A printed portfolio or better wix site	In progress
Be more open to making friends and connections in and out of school/work	Skill for life	Friends and socializing	Have many people I can ask for help	In progress
Practice interviewing and interview coding questions	April 15th	Online	Reflect on interviews and questions asked	Not started

4. First 30 / 60 / 90 Days After Graduation

Timeframe	Priority actions	How I will stay accountable / adjust
First 30 days	Apply to as many internships as possible if I don't have a job yet. Continue practicing skills anyway. Move to a full-time job and start setting up investments, savings, budget.	I will continue working on improving my skills so that my passion doesn't go away
By 60 days	Have made progress on personal goals and growth; reanalyze my situation and see what I need to work more on	If things don't feel right, I know that's a sign to look internally and see what I can control and change

Timeframe	Priority actions	How I will stay accountable / adjust
By 90 days	Ensure any existing debts are cleared. Have an internship at the very least. See options for graduate school and becoming more specialized.	Plan for all possible outcomes, if I don't have a job, I will find a way to monetize personal/freelance projects. I can invest in higher education if there's more I can do to be more qualified in the Tech field.

5. Support and Follow-Through

People and resources I will use *Advisors, faculty, alumni, supervisors, career services, professional groups, family, or other supports.*

My cousin who's a software engineer, career services if needed

My next scheduled check-in *Who, when, and what I will review.*

My EIR I met with about my resume, meet with her towards the end of this semester and see if I what I can work on.

Completed	What changed?	What remains?
Date: _____ _____	One thing that is different from my last entry: _____	One question or priority I am carrying forward: _____

Closing Reflection: My Growth Across the CV Curriculum

Review your four checkpoints before responding. Your path may have become clearer, changed direction, or remained intentionally open. Focus on what you understand and can do now that you could not at the beginning.

What I understand about myself now

Which interests, values, strengths, or work preferences have become clearer?

Leveraging all my qualities to see what I'd be best at, even if I wasn't interested in them to begin with. I know where I want to work, the realities of the real world, and planning a life that I'll be satisfied with.

How my direction developed

What choices, experiences, information, or people most influenced my thinking?

Meeting with the EIRs has completely changed my view on just about everything I thought to be true about planning for success. Those meetings motivated me to work much harder than I was before. I know a lot more about how to be an adult now than ever.

What I am prepared to do next

What is the most important commitment in my transition plan, and why?

I think continuing to improve my skills outside of class is the most important, because there are a lot of things about development that I can teach myself. Collecting more applications of my skills are so crucial to getting a job.

What I will continue learning

What question, uncertainty, or growth area will I carry forward?

I will carry forward the uncertainty of the job market, which makes me want to have a wide set of specific skills that I can apply in multiple different fields if need be.

This document is yours to keep and continue updating after graduation.
